DISCLOSURE STATEMENT

While every effort has been made to ensure the accuracy and completeness of this information, Magellan Health does not warrant the accuracy or completeness of any of this information. Magellan Health assumes no legal liability or responsibility whatsoever for the accuracy or completeness of any such information contained in this guide.

This guide is intended to facilitate the implementation of HIPAA-required transactions between trading partners. If changes are required in this document, they will be made in a timely manner. The parties using these materials are responsible for ensuring that they obtain and use the most current version of this guide. Magellan Health will make reasonable efforts to communicate changes to direct trading partners.

The information contained in this Abbreviated Companion Guide does not contradict requirements defined in the ASC X12N HIPAA Implementation Guides.

PREFACE

The Health Insurance Portability and Accountability Act (HIPAA) requires health insurance payers and covered entities in the United States to comply with the EDI standards for health care as defined in the ASC X12N Implementation Guides.

This Companion Guide to the v5010 ASC X12N Implementation Guides and associated errata adopted under HIPAA clarifies and specifies the data content when exchanging electronically with Magellan Health.

Transmissions based on this companion guide, used in tandem with the v5010 ASC X12N Implementation Guides, are compliant with both ASC X12 syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N Implementation Guides adopted for use under HIPAA.

The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the Implementation Guides.

1. INTRODUCTION

1.1. SCOPE

Covered entities (payers, health care providers, health plans and clearinghouses) must comply with the ASC X12N 834 (005010X220A1) TR3 for submission of Benefit Enrollment and Maintenance for 834 data content, response times, connectivity, and system availability. This document should be used to supplement the X12 TR3.

1.2. OVERVIEW

The Companion Guide provides Magellan Health trading partners with guidelines for submitting 5010 version of 834 (version 005010X220A1). The Magellan Health Companion Guide documents any assumptions, conventions, or data issues that may be specific to Magellan Health business processes when implementing the HIPAA ASC X12N 5010A Technical Reports Type 3 (TR3). As such, this Companion Guide is unique to Magellan Health and its affiliates.

This document does NOT replace the HIPAA ASC X12N 5010A Technical Reports Type 3 (TR3) for electronic transactions, nor does it attempt to amend any of the rules therein or impose any mandates on any trading partners of Magellan Health. This document provides information on Magellan Health- specific code handling and situation handling that is within the parameters of the HIPAA administrative Simplification rules. Readers of this Companion Guide should be acquainted with the HIPAA Technical Reports Type 3, their structure and content. Information contained within the HIPAA TR3s has not been repeated here although the TR3s have been referenced when necessary. The HIPAA ASC X12N 5010A Technical Reports Type 3 (TR3) can be purchased at <http://store.x12.org>.

1.3. REFERENCES

The ASC X12N 834 (version 005010X220A1) TR3 guide for Benefit Enrollment and Maintenance has been established as the standard for eligibility transactions and is available at <http://store.x12.org/store>.

Magellan Health Portal containing documentation on transactions for providers is located at www.edi.magellanprovider.com, under Provider Resources tab.

2. GENERAL TRANSACTION PROTOCOL

2.1. BUNDLING

- One ISA/IEA interchange per file is required.
- One GS/GE functional group per interchange is required.
- ST/SE Transaction set Header

2.2. CHARACTER DELIMITERS

- * Asterisk Data Element Separator
- ^ Carat Repetition Separator
- : Colon Component Element Separator
- ~ Tilde Segment Terminator

2.3. CONTROL

- ISA interchange control number (ISA13) must be unique across all files sent.
- GS group control number (GS06) must be unique across all files sent (this is numeric field, so no leading zero beyond the minimum field size are acceptable. Other than leading zeros, the GS Control number is usually equal to the ISA control number).
- Each ST transaction set control (ST02) must be unique within the GS/GE functional group.
- BGM03 transaction reference identifier must be unique across all files sent.

2.4. ACKNOWLEDGEMENTS

Magellan will return a 999-acknowledgement report for all corresponding 834 files.

*Please note that any rejected records are not sent to Magellan's source system and will need to be corrected by the client and resent. **Until the record passes validation, the member data will not be loaded.**

2.5. TRANSACTION SPECIFICATIONS

Transaction Specifications referenced in the Loop and Segment Information segment describe the codes that Magellan Health expects to receive and specify the type and format of the information that will be included in data elements. In some cases, these values are

subsets of the data element values listed in Implementation Guides. In others, they are specific to Magellan Health. For example, member mailing address is specified as situational in the Implementation Guides but is required at Magellan Health. *Please note situational fields if sent subfields may be deemed required in the Implementation Guides. Please refer to Implementation Guide for confirmation.
